- Technologies: Symfony, MySQL, React

Projects

TicksBook

Open Source

- Developing an app to track my group's options portfolio.
- It uses DDD, CQRS, and EventSourcing concepts for the core domain.
- Technologies: TypeScript, NestJS, EventStoreDB, MongoDB, Vue, Vuetify, Heroku, Vercel
- GitHub Repositories: [Vue Client](#) and [Nest API](#)

NPM Packages

Open Source

- Developed two packages to reuse code across my projects. It is an NX monorepo.
- [pl-oss/core](#): contains classes for shared things like Aggregate, Auth, Payments.
- [pl-oss/adapters](#): contains various implementations of the core classes of pl-oss/core.
- Technologies: Nx, TypeScript, NestJS

Technical Skills

Concepts	OOP, Functional, MVC, CQRS, EventSourcing, DDD, Microservices
Languages	JavaScript, TypeScript, PHP, SQL, HTML, CSS, Python
Others	GraphQL, REST, React, Vue, Express, NextJS, NestJS, Jest, Nx, Flask, FastAPI, Django, MongoDB, EventStoreDB, Docker, Tailwind CSS, Vuetify, MUI, Figma

Education

Computer Programmer Diploma

Georgian College, Barrie

Jan 2017 - Dec 2018

I learned HTML, CSS, JavaScript, PHP, Java, C# and much more. I led team projects and presentations. One such example is the SDLC drama we performed which was recognized as one of the best.
